Course Projects

Website using React, Node, Express, MongoDB
    "Tariq Magsi" is my profile website.

Website using React, Redux, Node, Express, MongoDB
    "TA'ALAM ALQURAN" is online Quran learning website having CMS and Website where students can learn Quran from teachers. It has 3 portals Admin portal, student portal and teacher portal. Admin can manage all students, courses and teacher and teacher can teach students and upload books, do announcements. Students can only read what teacher has posted and enroll in courses after confirmation of admin.

Mobile Application using React Native, Node, Express, MongoDB
    "Facebook" is a dummy facebook mobile application used database for just login logout and signup.
